

## Clipsham

### Technical Data

Description	Coarse grained Limestone Durable with good weathering qualities
Country of Origin	UK
Geological Type	Oolitic Limestone, Middle Jurassic Age
Colour	Creamy brown colour with high shell content. Blocks can occasionally contain the harder, blue stone
Density	2162 kg/m <sup>3</sup>
Compressive Strength	22.41 MPa
Water Absorption	7.20 %
Porosity	20.30 %
Durability	Good resistance to weathering and damage from salts, may require extra protection or careful design if used in highly exposed locations
Flexural Strength (3 Point)	4.50 MPa
Flexural Strength (3 Point)	4.17 MPa post 48 cycle freeze thaw
Saturation co-efficient	0.78 %
